

**Amendment to the Claims:**

The claim listing which begins on the next page will replace all prior versions, and listings, of claims in the application.

## **Claim Listing**

1-10 Canceled.

11. (New) An interchange overpass comprising

- a main road (1);
- an intersected road (3);
- one or more U-shaped semi-circular roads (24) each having an inner semi-circle road (4) and an outer semi-circle road (5);
- one or more connection platforms (23);
- one or more right on-ramps (9); and
- one or more common roads (7);

wherein

said main road (1) is connected to said U-shaped semi-circular roads (24) by said right on-ramps (9), said common roads (7), and optionally said inner semi-circle road (4);

said intersected road (3) is connected to said U-shaped semi-circular roads (24) by said connection platforms (23); and

said connection platforms (23) are connected to said U-shaped semi-circular roads (24) and said common roads (7).

12. (New) The interchange overpass of claim 11, wherein said common road (7) is disposed between said inner semi-circle road (4) and said outer semi-circle road (5).

13. (New) The interchange overpass of claim 11, wherein said common road (7) passes under said outer semi-circle road (5).

14. (New) The interchange overpass of claim 11, wherein said main road (1) comprises an arched separated bridge (2).

15. (New) The interchange overpass of claim 14, wherein said intersected road (3) comprises one or more semi-ramped overhead bridge stages (8).

16. (New) The interchange overpass of claim 15, wherein said arched separated bridge (2) in connected to said semi-ramped overhead bridge stage (8) by said connection platform (23).

17. (New) The interchange overpass of claim 14, wherein said arched separated bridge (2) has a road surface and said the connection platform (23) has a road surface, and said road surface of said arched separated bridge (2) and said road surface of said connection platform (23) are at about the same relative height with respect to each other.

18. (New) The interchange overpass of claim 14, wherein said arched separated bridge (2) has a road surface and said U-shaped semi-circular roads (24) have a road surface, and said road surface of said arched separated bridge (2) and said road surface of said U-shaped semi-circular roads (24) are at about the same relative height with respect to each other.

19. (New) The interchange overpass of claim 11, wherein said U-shaped semi-circular roads (24) comprise further an arcuate end (25) having a road surface; said the connection platform (23) has a road surface; and said road surface of said arcuate end (25) is at a higher relative height than said road surface of said connection platform (23) with respect to each other.

20. (New) The interchange overpass of claim 14, comprising further a convergent secondary road (17), wherein said convergent secondary road (17) is provided at an intersection of said inner semicircle road (4) and said arched separated bridge (2).

21. (New) The interchange overpass of claim 11 comprising further an underpass tunnel (6), wherein said intersected road (3) is disposed within said underpass tunnel (6).

22. (New) The interchange overpass of claim 11 comprising further an overhead bridge, wherein said intersected road (3) is disposed on top of said overhead bridge

23. (New) The interchange overpass of claim 11 comprising further one or more U-turn

driveways (28) allowing for a direct U-turn on said intersected road (3).

24. (New) The interchange overpass of claim 11 comprising further a right turn branch lane (31) and a right turn road (32), wherein said right turn branch lane (31) is not directly connected to said U-shaped semi-circular roads (24), said right turn branch lane (31) connects said main road (1) to said intersected road (3), said right turn road (32) is not directly connected to said U-shaped semi-circular roads (24), and said right turn road (32) connects said intersected road (3) to said main road (1).

25. (New) The interchange overpass of claim 14, wherein vehicles traveling straight through said main road (1) travel on the arched separated bridge (2) underneath said arcuate part (25).

26. (New) The interchange overpass of claim 15, wherein vehicles traveling straight through said intersected road (3) travel through said semi-ramped overhead bridge stage (8) onto said connection platform (23), then enter said U-shaped circle road (24), then enter said outer semi-circle road (5), then enter said connection platform (23), then travel through said semi-ramped overhead bridge stage (8) continuing onto said intersected road (3).

27. (New) The interchange overpass of claim 15, wherein vehicles turning from said main road (1) onto said intersected road (3) enter said common road (7), then enter said connection platform (23), then turn right entering said semi-ramped overhead bridge stage (8), and continue onto said intersected road 3.
